ESTIMATES OF SCHOOL STATISTICS, 1966-67.

BY- FLANIGAN, JEAN M. SHAPIRO, NETTIE S.

NATIONAL EDUCATION ASSN., WASHINGTON, D.C.

REPORT NUMBER RR-1966-R20 PUB DATE 60

EDRS PRICE NF-\$0.25 HC NOT AVAILABLE FROM EDRS. 38P.

DESCRIPTORS- BOARDS OF EDUCATION, *SCHOOL DISTRICTS, SCHOOL SUPERINTENDENTS, *STUDENTS, *INSTRUCTIONAL STAFF, *INCOME, *EXPENDITURES, POPULATION DISTRIBUTION, STUDENT ENROLLMENT, AVERAGE DAILY ATTENDANCE, AVERAGE DAILY MEMBERSHIP, HIGH SCHOOL GRADUATES, TEACHER SALARIES, TABLES (DATA), STATISTICAL DATA, PUBLIC SCHOOL SYSTEMS, ELEMENTARY SCHOOLS, SECONDARY SCHOOLS, DISTRICT OF COLUMBIA,

THIS REPORT IS THE 25TH IN THE SERIES OF ANNUAL ESTIMATES OF PUBLIC SCHOOL STATISTICS. IT INCLUDES ESTIMATES OF THE ADMINISTRATIVE ORGANIZATION, PUPILS, HIGH SCHOOL GRADUATES, PROFESSIONAL STAFF AND SALARIES, AND REVENUES AND EXPENDITURES IN THE FALL OF 1966. NATIONAL, REGIONAL, AND STATE ESTIMATES ARE SHOWN FOR THE SCHOOL YEAR 1966-67, AND REVISED ESTIMATES ARE SHOWN FOR THE SCHOOL YEAR 1965-66. DEFINITIONS FOR THE INCLUDED STATISTICS ARE GIVEN. THIS DOCUMENT IS ALSO AVAILABLE AS STOCK NO. 435-133D2 FROM THE NATIONAL EDUCATION ASSOCIATION, 12D1 SIXTEENTH STREET, N.W., WASHINGTON, D.C. 20D36, FOR \$1.0D. (HW)

FOREWORD

This is the 25th in the series of annual estimates of public-school statistics. It comprises estimates of the administrative organization, pupils, high-school graduates, professional staff and salaries, and revenues and expenditures in the fall of 1966. National, regional, and state estimates are shown for this school year 1966-67, and revised estimates are shown for the school year 1965-66.

With few exceptions, as noted in the text and tables, the estimates are generally consistent in definition with the accounting standards of the U. S. Office of Education. All figures in this report for this year and last year should be identified as estimates and should not be used after the final reports of state and national data become available.

Estimates for this year and the revised estimates for last year presented special problems in forecasting federal revenues for schools and their impact on school expenditures. With regard to last year's estimates, the federal revenues which were spent for summer programs after the close of the school fiscal year in June 1966 are accounted for in some states as revenues and expenditures for 1965-66 and in others as entries in 1966-67. With regard to this year's estimates, 1966-67, there was further uncertainty both as to the amount of the state allocations under the various federal programs and the legal limitations in some states which forbid a local school system to budget for expenditures based on revenues which have not been secured.

This project is a cooperative one, involving state departments of education, state education associations, and the NEA Research Division. Preliminary estimates of the NEA Research Division are submitted to the state departments of education and to the state education associations for verification or revision. State figures which have not been approved or revised on the basis of information from the various states are marked as NEA Research Division estimates.

The totals for the United States shown in the text tables for years before 1958-59 cover 48 states and the District of Columbia. Alaska is included in the totals for 1958-59; and both Alaska and Hawaii, in the totals for 1959-60 and subsequent years. Figures for American Samoa, Canal Zone, Puerto Rico, and the Virgin Islands are given in Table 13.

This report was prepared by Nettie S. Shapiro, Research Associate, under the general direction of Jean M. Flanigan, Assistant Director, and with the assistance of Simeon P. Taylor, Assistant Director and Chief of Statistics, Richard E. Scott, Associate Chief of Statistics, and Louise V. Trumbo, Statistical Clerk.

The Research Division expresses deep appreciation to the officials of state departments of education and state education associations whose cooperation made the preparation of this report possible.

GLEN ROBINSON Director, Research Division

HIGHLIGHTS: 1966-67 and 1965-66 ESTIMATES

Statistics of public elementary and secondary school systems

	Schoo	l year	Change

In average daily attendance	J04	323	Ŧ J)	17.67

GENERAL ADMINISTRATION

Each state has a state department of education, headed by a chief state school officer, which exercises general control over public elementary and secondary schools. Many states, particularly those with large numbers of small school districts, have intermediate administrative units operating between the state and the local levels. These intermediate units do not operate schools, but render consultative, advisory, and statistical services, and perform regulatory and inspectional functions. The local school district is the basic administrative unit for the operation of elementary and secondary schools or for contracting for school services. The governing body of the district is the school board. The chief administrative officer is the superintendent of schools.

Basic Administrative Units

In organization, size, and characteristics, local school districts vary greatly throughout the United States. They may be independent governmental units or agencies of a state, county, or local government. All school districts in 29 states are independent governmental units; in four states and the District of Columbia all districts are dependent. In the remaining states there are school districts of both types. 1

A school district may operate a school system for all or for some of its children or may pay other school districts for these services. In complexity of operation, these basic local units range from one-teacher rural systems to large metropolitan systems serving thousands.

The number of basic administrative units reported in 1931-32 was 127,422. Primarily as a result of reorganization laws, which have facilitated the consolidation and annexation of school districts, the number of such units has declined steadily. The 1966-67 total of 23,335 represents an 81.7-percent decrease from the 1931-32 figure; a 56.1-percent decrease in the 10-year period since 1956-57; and a 12.1-percent decrease in the past year.

The trend over the past 10 years in the total number of basic administrative units in the states and the District of Columbia is shown below by combining figures of the U.S. Office of Education with NEA Research Division estimates (NEA Research Division estimates are starred):

School year	Basic adminis trative units
1956-57	53,197*
1957-58	47,594
1958-59	43,507*
1959-60	40,520
1960-61	37,475*
1961-62	
1962-63	32,820*
1963-64	31,705
1964-65	28,777*
1965~66	26,561*
1966-67	23,335*

Of the 23,335 basic administrative units estimated for 1966-67, 21,697, or 93.0 percent, are operating school districts; the remaining 1,638 do not operate any school facility, but transfer their pupils elsewhere. The comparison below of regional distributions of operating school districts and pupil enrollments in the fall of 1966 gives some indication of the variation in size of school district.

^{1/} U. S. Department of Commerce, Bureau of the Census. <u>Census of Governments</u>, 1962: <u>Governmental Organization</u>. Vol. I. Washington, D. C.: Government Printing Office, 1963. p. 4.

a/ Alaska and Hawaii are included in the U. S. totals, but are not included in the regional figures. Hence, details for regions do not add to totals. See Tables 1 through 12 for grouping of states by geographical area and for comparison of state totals with regional and national totals.

Board Members

With the decrease in the number of administrative units has come a decrease in the number of school-board members and trustees. These are citizens elected or appointed to determine policy and to exercise general supervision over the operations of the local school systems. The U.S. Office of Education reported a total of 423,974 school-board members in 1933. By 1965-66, the number of school-board members in basic units had decreased to an estimated 128,622. In 1966-67 the number of school-board members was estimated at 114,244.

School Superintendents

The superintendent of a school system is a professional person in charge of the administration of the activities of the local school system. A number of superintendents administer the functions of two or more local school systems. More superintendents have been added in some states as the size of the school systems increased. The number of superintendents in the basic units was estimated at 13,744 for 1965-66 and at 13,481 for 1966-67. These totals are smaller than the total number of persons with the title of "superintendent of schools" since they do not include state superintendents or superintendents of intermediate units (such as counties in the western states), and a few other special types.

PUPILS

School-age population (5 to 17 years), enrollments, average daily membership, and average daily attendance are basic to the measurement of the size and cost of the public schools. Estimates of state school-age population and fall enrollments are shown in Table 2 for 1965-66 and 1966-67. The figures for the 50 states and the District of Columbia for cumulative enrollments, average daily membership, and average daily attendance are shown in Table 3 for 1965-66 and in Table 4 for 1966-67.

Population 5-17 Years of Age

The population aged 5-17 years is the age group which is most significant for predicting the elementary- and secondary-school enrollments. According to the Decennial Census the school-age population of the United States, including Alaska and Pawaii, increased from 30,724,284 on April 1, 1950, to 43,881,109 on April 1, 1960, an increase of 42.8 percent. The total population of the United States, excluding the Armed Forces overseas, increased from 151,325,798 to 179,323,175 over the same period, an increase of 18.5 percent. The school-age population was 20.3 percent of the total population in 1950, and had increased to 24.5 percent of the total population by 1960. The Bureau of the Census estimated that the age group (5-17) was 49,995,000 as of July 1, 1965, and 50,814,000 for July 1, 1966. The school-age population on July 1, 1966, showed a gain of 15.8 percent over April 1, 1960, and accounted for 25.9 percent of the total resident population. The 10-year trend in school-age population compared with fall enrollment is given in the next section.

Public-School Enrollment: Fall and Cumulative

The figures for resident school-age population (5-17 years) and estimated fall enrollment in public elementary and secondary schools for the past 10 years are shown below (NEA Research Division estimates are starred; other fall enrollment figures are from USOE):

School <u>year</u>	Total resident school-age population as of July 1ª/	Total fall enrollment <u>a</u> /	Percent enrollment is of school-age population
1957-58	39,968,000	32,951,000	82.4%
1958-59	41,431,000	34,107,355	82.3
1959-60	42,870,000	35, 182, 343	82.1
1960-61	44,189,000	36,281,294	82.1
1961-62	45,303,000	37,464,074	82.7
1962-63	46,698,000	38,748,907	83.0
1963-64	48,105,000	40,186,751	83.5
1964-65	49,536,000	41,339,929*	83.5
1965-66	49,995,000	42,018,433*	84.0
1966-67	50,814,000	42,986,514*	84.6

a/ Alaska and Hawaii are included.

State-by-state estimates of cumulative enrollments for 1965-66 and 1966-67 are shown in columns 2 to 4 of Tables 3 and 4. The NEA Research Division estimates include kindergarten in the elementary-school enrollments, include junior high schools in the secondary-school enrollments, and omit junior-college enrollments. These figures reflect cumulative enrollment by organization level, elementary and secondary, through the end of each school year. The following figures show enrollments for the years 1956-57 through 1966-67 in the NEA series.

		(NEA Series) $_$	
School year	Elementary	Secondary	<u>Total</u>
1956-57	22,986,381	9,282,078	32,268,459
1957-58	23,560,341	9,776,108	33,336,449
1958-59	24,125,361	10,826,916	34,952,277
1959-60	24,538,843	11,499,094	36,037,937
1960-61	25,436,897	12,052,584	37,489,481
1961-62	25,687,137	13,005,450	38,692,587
1962-63	26,162,345	14,194,666	$40,390,049^{\frac{a}{2}}$
1963-64	26,375,458	15,161,428	41,536,886
1964-65	27,127,448	15,740,118	42,867,566
1965-66	27,672,348	15,904,750	43,577,098
1966-67	28,183,996	16,409,860	44,593,856

a/ Includes 33,038 unclassified enrollees in grades K-12.

A total cumulative enrollment of 44,593,856 is estimated for the school year 1966-67. This is an increase of 2.3 percent over 1965-66, and an increase of 38.2 percent over 1956-57. The percents of increase in enrollment over 1956-57 and for each year over the previous year are shown below.

	_	in cumulat		Increase i rollment ov	n cumulativ er previ o us	
School year	Elementary	Secondary	<u>Total</u>	Elementary	Secondary	Total
1957-58	2.5%	5.3%	3.3%	2.5%	5.3%	3.3%
1958-59	5.0	16.6	8.3	2.4	10.7	4.8
1959-60	6.8	23.9	11.7	1.7	6.2	3.1
1960-61	10.7	29.8	16.2	3.7	4.8	4.0
1961-62	11.7	40.1	19.9	1.0	7.9	3.2
1962-63	13.8	52.9	25.2	1.8	9.1	4.4
1963-64	14.7	63.3	28.7	0.8	6.8	2.8
1964-65	18.0	69.6	32.8	2.9	3.8	3.2
1965-66	20.4	71.3	35.0	2.0	1.0	1.7
1966-67	22.6	76.8	38.2	1.8	3.2	2.3

Elementary-school enrollment increased 1.8 percent from 1965-66 to 1966-67, and since 1956-57 it has increased 22.6 percent. Secondary-school enrollment increased 3.2 percent from 1965-66 to 1966-67, and since 1956-57 it has increased an estimated 76.8 percent.

The NEA Research Division enrollment estimates are cumulative enrollments to the end of the school year. The enrollment figures reported in the Statistics of State School Systems of the U.S. Office of Education are comparable to NEA Research Division estimates in respect to time, method of computation, and totals, but differ in that the U.S. Office of Education divides total enrollment into grade levels rather than into the organization levels of the NEA Research Division estimates.

The NEA Research Division estimates of total elementary and secondary enrollment and the total figures reported later by the U. S. Office of Education in the Statistics of State School Systems are comparable. The estimates of the total enrollment in the NEA series shown above and the total enrollment figures reported in the Statistics of State School Systems series of the U. S. Office of Education shown below have differed only slightly for the years 1955-56 through 1963-64. The difference between the U. S. Office of Education figures of total enrollment for 1963-64 and the NEA Research Division estimates for the same year is 1.2 percent.

	Cumulative public-school enrollment (USOE Series)			
1	Kindergarten	Grades 9 through 12	Total	
School year	through grade 8	and postgraduates

Average Daily Membership

A pupil is a member of a school from the date he is placed on the current roll until he leaves permanently. Membership is the total number of pupils belonging, the sum of those present and those absent. Average daily membership for the school year is an average obtained by dividing the aggregate days of membership by the number of days in which schools were in session.

The U. S. Office of Education in <u>State Educational Records and Reports Series: Handbook II</u> recommends average daily membership as the best measure of pupil load. However, some states have not adopted this method for reporting pupils.

Column 5 of Tables 3 and 4 gives ADM for 1965-66 and for 1966-67 for the states reporting and an estimated total for the 50 states and the District of Columbia. In 1965-66 the estimated ADM was 41,497,034; in 1966-67, 42,444,661. This represents a gain of 2.3 percent.

The 10-year trend in average daily membership shows an increase of 37.6 percent since 1956-57. The estimated average daily membership since 1956-57 is shown below as a combination of the figures of the U.S. Office of Education and NEA Research Division (NEA Research Division estimates are starred):

•	Average	Percent	increase
	daily	Oyer	Over pre-
School year	membership	<u> 1956-57</u>	vious year

Average Daily Attendance

The average daily attendance for the school year is the aggregate days the pupils were actually in school divided by the number of days school was actually in session. From 1965-66 to 1966-67, average daily attendance increased to a total of 39,805,427, or 2.3 percent. The figures below show the trend in average daily attendance by combining the figures of the U. S. Office of Education and the NEA Research Division estimates (NEA Research Division estimates are starred):

	Average	Percent	increase
	daily	Over	Over pre-
School year	attendance	<u> 1956-57</u>	vious year
1956-57	28,871,000*	• • •	• • •
1957-58	29,722,000	2.9%	2.9%
1958-59	31,095,000*	7.7	4.6
1959-60	32 477,000	12.5	4.4
1960-61	33,425,470*	15.8	2.9
1961-62	34,682,000	20.1	3.8
1962-63	36,015,853*	24.7	3.8
1963-64	37,405,058	29.6	3.9
1964-65	38,363,303*	32.9	2.6
1965-66	38,904,661*	34.8	1.4
1966-67	39,805,427*	37.9	2.3

Average daily attendance was 89.3 percent of the total cumulative enrollment in 1965-66 (Table 3, column 8). It is estimated that in 1966-67 average daily attendance will also be 89.3 percent of enrollment (Table 4, column 8). Average daily attendance as a percent of enrollment is shown below for the school years 1956-57 through 1966-67 (NEA Research Division estimates are starred):

School year	Percent ADA is of cumulative enrollment
1956-57	89.5%*
1957-58	88.6
1958-59	89.0*
1959-60	90.0
1960-61	89.2*
1961-62	90.7
1962-63	89.2*
1963-64	91.2
1964-65	89.5*
1965-66	89.3*
1966-67	89.3*

Column 9 of Tables 3 and 4 shows that average daily attendance is 93.8 percent of average daily membership for both 1965-66 and 1966-67 for the 50 states and the District of Columbia. The difference between 100 percent and the percents shown in this column is an indication of average daily absence.

High-School Graduates

An estimated 2,421,666 high-school pupils will graduate in 1966-67. This is an increase of 2.7 percent over the estimated number of graduates in 1965-66 and 81.8 percent higher than in 1957-58. The estimate of public high-school graduates in 1965-66 was 2,358,859. The 1964-65 estimated number of graduates was 17.6 percent higher than in 1963-64 and the 1963-64 estimated number of graduates was 15.9 percent higher than in 1962-63. These percentage increases reflect the large increases in births in 1946 and 1947, and the slight downward leveling off which started in 1948. The also reflect the greater holding power of the schools in keeping pupils in school through high-school graduation. The figures below show the 10-year trend by combining the figures of the U. S. Office of Education and the NEA Research Division estimates (starred):

		Percen	t change
School year	Number of high- school graduates	Over 1957-58	Over pre- vious year
1957-58	1,332,000	• • •	•••
1959-60	1,627,000	22.1%	$22.1\%\frac{a}{2}$

a/ Increase for biennium.

INSTRUCTIONAL STAFF

The instructional staff comprises classroom teachers, principals, supervisors, librarians, guidance and psychological personnel, and related instructional workers. In these estimates the series on the <u>total</u> instructional staff is more reliable than the series on the staff components because of the differences among states in the classifications of positions within the instructional staff and shifts in these classifications over the years.

Total Instructional Staff

The total instructional staff in 1966-67 is estimated at 1,939,619. This is an increase of 3.8 percent over the revised estimate of 1,867,890 staff members in 1965-66. The NEA Research Division estimates of the numbers of classroom teachers, principals, supervisors, and other instructional staff are shown below for each of the past two years.

<u>Instructional staff</u>	1965-66	<u> 1966-67</u>
Elementary-school classroom teachers	962,403	996,031
Secondary-school classroom teachers	734,159	763,205
Total classroom teachers	1,696,562	1,759,236
Other instructional staff	70,562	75,376
Principals and supervisors	100,766	105,007
Total staff	1,867,890	1,939,619

Since 1956-57 the instructional staff has increased 52.6 percent, an average rate of 4.3 percent a year. The trend in the total instructional staff since 1956-57 is shown below as a combination of the figures of the U.S. Office of Education and NEA Research Division estimates (starred):

		Perce	ent gain
	Instructional	Over	Over pre-
School year	<u>staff</u>	<u> 1956-57</u>	<u>vious year</u>

1961-62	1,587,761	24.9	4.3
1962-63	1,651,230*	29.9	4.0
1963-64	1,716,577	35.0	4.0
1964-65	1,796,574*	41.3	4.7
1965-66	1,867,890*	46.9	4.0
1966-67	1,939,619*	52.6	3.8

Classroom Teachers

Trends in the number of elementary- and secondary-school classroom teachers since 1956-57 are shown below in a combination of U. S. Office of Education figures and NEA Research Division estimates (starred):

School year	Elementary-school classroom teachers	Secondary-school classroom teachers	Total class- room teachers
1956-57	750,702*	440,163*	1,190,865*
1957-58	778,324	459,525	1,237,849
1958-59	808,475*	484,248*	1,292,723*
1959-60	833,772	521,186	1,354,958
1960-61	848,853*	554,483*	1,403,336*
1961-62	877,307	580,657	1,457,964
1962-63	893,656*	618,997*	1,512,653*
1963-64	906,606	661,368	1,567,974
1964-65	929,458*	707,263*	1,636,721*
1965-66	962,403*	734,159*	1,696,562*
1966-67	996,031*	763,205*	1,759,236*

The elementary-school classroom teachers totaled 996,031 in 1966-67, a gain of 3.5 percent over the revised estimate of 962,403 for 1965-66. The elementary-school classroom teaching staff has increased 32.7 percent since 1956-57.

By 1966-67 the secondary-school classroom teachers numbered an estimated 763,205, a gain of 4.0 percent over the revised estimate of 734,159 for 1965-66. Over the years since 1956-57 the number of secondary-school teachers has increased 73.4 percent.

For 1966-67 the total number of classroom teachers is estimated at 1,759,236, a gain of 3.7 percent over the revised estimate of 1,696,562 for 1965-66. Since 1956-57 the total classroom teaching staff has increased 47.7 percent.

The figures below show the percent of change in the number of classroom teachers since 1956-57 and changes year by year.

	teacher	number of cl			number of cl	
School year	<u>Elementary</u>	Secondary	<u>Total</u>	Elementary	Secondary	<u>Total</u>
1957-58	3 .7 %	4.4%	3.9%	3.7%	4.4%	3.9%

Men and Women Classroom Teachers

Men classroom teachers as a percent of total classroom teachers have been increasing steadily. In 1966-67, it is estimated that men will account for 31.7 percent of the teaching staff in elementary and secondary schools as compared with 25.9 percent in 1956-57. In actual numbers, men teachers will increase from 308,310 in 1956-57 to an estimated 557,310 in 1966-67, or 80.8 percent. In the same period, women teachers will increase from 882,555 in 1956-57 to an estimated 1,201,926, or 36.2 percent. The percentage increase in men teachers has been greatest in the secondary schools--93.5 percent higher in 1966-67 than in 1956-57. In the elementary schools the increase over the same period was 52.2 percent. State details on the estimated numbers of men and women classroom teachers are shown in Tables 5 and 6 for 1965-66 and 1966-67.

The figures and percentages given below show the trend in the employment of men on the teaching staff. The figures are from the U.S. Office of Education and the NEA Research Division (NEA Research Division estimates are starred):

Percent of all class-Number of men classroom room teachers teachers Elementary Secondary <u>Total</u> Total Elementary Secondary School year 12.7% 48.4% 25.9% 308,310 95,375 212,935 1956-57* 50.4 26.8 12.8 231,817 331,663 99,846 1957-58 27.3 50.2 353,432 13.7 242,936 110,496 1958-59* 52.8 29.0 14.1 117,616 392,670 275,054 1959-60 29.3 52.6 411,747 14.2 120,250 291,497 1960-61* 29.9 14.5 53.3 436,575 309,398 1961-62 127,177 30.1 52.8 14.5 326,670 455,831 1962-63* 129,161 14.5 53.9 31.1 487,967 356,497 1963-64 131,470 31.5 53.5 14.7 378,402 515,160 136,758 1964-65* 31.6 14.5 53.9 535,294 395,940 139,354 1965-66* 31.7 54.0 14.6

Instructional Staff Salaries

1966-67*

The estimate of the average salary of the instructional staff in 1966-67 is \$7,119 (Table 8). The revised estimate for 1965-66 is \$6,786 (Table 7). The gain of \$333 represents an increase of 4.9 percent.

These average salary figures are for the entire instructional staff--classroom teachers, principals, supervisors, and other instructional personnel. In the computation of the national average, each state average is weighted by the number of instructional staff members in the state.

The trend in average salaries is shown below as a combination of figures of the U.S. Office of Education and estimates of the NEA Research Division (starred):

School year	Average annual salary of in-structional staff	Percent Over 1956-57	of increase Over pre- vious year
1956-57	\$4,350*	• • •	• • •
1957-58	4,702	8.1%	8.1%
1958-59	4,939*	13.5	5.0
1959-60	5,174	18.9	4.8
1960-61	5,449*	25.3	5.3
1961-62	5,700	31.0	4.6
1962-63	5,921*	36.1	3.9
1963-64	6,240	43.4	5.4
1964-65	6,465*	48.6	3.6
1965-66	6,786*	56.0	5.0
1966-67	7,119*	63.7	4.9

Salaries of the instructional staff have gained every year in the past 10 years at an average annual rate of 5.0 percent. The average salary per member of the instructional staff in 1966-67 is estimated at \$7,119, an increase of \$2,769, or 63.7 percent, over the average salary of \$4,350 in 1956-57. However, in terms of purchasing power, as measured by the Consumer Price Index of the U. S. Department of Labor, Bureau of Labor Statistics (1957-59 = 100.0), the average salary of instructional staff members was \$4,489 in 1956-57 and had advanced to \$6,239 in 1966-67. Insofar as the Consumer Price Index is an accurate measure of the increases in the cost of living for instructional staff members throughout the United States, the real gain in the purchasing power of average salaries amounted to 39.0 percent in the 10 years since 1956-57.

Classroom Teachers' Salaries

For 1965-66 the estimated average salary of classroom teachers was revised to \$6,485, or 95.6 percent of the average salary of the total instructional staff. The revised average annual salary of elementary-school teachers in 1965-66 was \$6,279; and of secondary-school teachers, \$6,761.

For 1966-67 the average salary of classroom teachers is estimated at \$6,821, or 95.8 percent of the figure for the entire instructional staff. This is a gain of 5.2 percent over the figure for 1965-66. The estimated average salary of elementary-school teachers in 1966-67 is \$6,609; and of secondary-school teachers, \$7,095.

The average salaries of elementary-school teachers are lower than those of secondary-school teachers; however, over the past years the difference has decreased. In 1956-57 the average annual salary of elementary-school teachers was 88.3 percent of the corresponding figure for secondary-school teachers. By 1966-67 the average salary of elementary-school teachers increased to 93.2 percent of the salary estimated for secondary-school teachers. The decrease in the difference may be the result of several factors: (a) increased preparation of elementary-school teachers, (b) more acute shortage of elementary-school teachers in the past 10 years, (c) longer periods of service, and (d) improved status in the position of elementary-school teachers.

Table 7, columns 6 through 13, and Table 8, columns 8 through 15, show by state the percent distribution of classroom teachers by salaries paid. The trend in this distribution for the United States is shown below:

			Percent	of class	room teache	rs paid:		
School year	Below \$3,500	\$3,500- 4,499	\$4,500- 5,499	\$5,500- 6,499	\$6,500- 7,499	\$7,500- 8,499	\$8,500- 9,499	\$9,500 or more

a/ Detailed breakdown not available beyond last salary range shown.

In 1956-57, about 35.0 percent of all classroom teachers were paid less than \$3,500. It is estimated that in 1966-67, 0.3 percent will be paid less than \$3,500. In 1956-57, 3 classroom teachers in 10 were paid \$4,500 or more; in 1966-67, more than 9 classroom teachers in 10 will be paid \$4,500 or more.

The average salaries paid classroom teachers from 1956-57 to 1966-67 are shown in the figures given below for elementary- and secondary-school teachers and all classroom teachers. Estimates of classroom teacher salaries are based on data compiled by the NEA Research Division.

Average annual salaries of classroom teachers, 1956-57 to 1966-67 Elementary Secondary Total School year \$4,044 \$4,239 \$4,581 1956-57 1957-58 4,373 4,894 4,571 1958-59 5,113 4,797 4,607 5,276 4,995 1959-60 4,815 5,543 1960-61 5,075 5,275 5,775 5,515 1961-62 5,340 1962-63 5,560 5,980 5,732 5,805 6,266 5,995 1963-64 6,451 6,195 1964-65 5,985 6,761 6,485 1965-66 6,279 1966-67 6,609 7,095 6,821

The percentage increases in salaries over 1956-57 and over the previous year are shown below. More detailed analyses of the salaries of instructional staff and classroom teachers are available in <u>Economic Status of Teachers in 1965-66</u>, Research Report 1966-R7.

	Classroom teachers' salaries					
	Increase	e in salary	over		e in salary	over

1966-67	63.4	54.9	60.9	5.3	4.9	5.2

Differences among the states in average salaries are great. Estimated average salaries paid to instructional staff by state in 1966-67 vary from a low of \$4,782 to a high of \$9,200. Salaries of instructional staff for the 50 states are distributed as follows:

Estimated average annual salary of instructional staff	Number of states
Below \$5,000	1
\$5,000-5,499	3
5,500-5,999	8
6,000-6,499	9
6,500-6,999	11
7,000-7,499	4
7,500-7,999	10
8,000-8,499	1
8,500-8,999	1
9,000-9,499	2

In 1966-67, the salary in the state with the highest average annual salary of instructional staff is about twice that in the state with the lowest salary. In 1956-57, the ratio between the highest and the lowest average state salaries was about 2.3 to 1. Notwithstanding this decrease in percentage relationship, the dollar gap has widened by almost \$1,400 over this 10-year period.

REVENUE AND NONREVENUE RECEIPTS

The total revenue and nonrevenue receipts of public schools are estimated at \$30,194,908,000 for 1966-67. This is an increase of 7.9 percent over the revised estimated total receipts of \$27,974,203,000 for 1965-66.

All receipts which become available during the school year are reported; receipts which are used for payment of principal and interest on long-term debt and nonrevenue receipts which are used largely for capital outlay expenditures are included. The figures on expenditures, however, include capital outlay but exclude principal payments. Chiefly for this reason, the total receipts will generally be in excess of the total expenditures.

Revenue Receipts

This series includes revenue receipts available for expenditures for current expenses, (including non-day school programs operated by the public schools) capital outlay, and debt service for public schools. Included as revenue receipts are all appropriations from general funds of federal, state, county, and local governments, receipts from taxes levied for school purposes, income from permanent school funds and endowments, income from leases of school lands, interest on bank deposits, tuition, gifts, etc.

For 1966-67, revenue receipts are estimated at \$26,821,486,000, an increase of 8.1 percent over the revised estimate of \$24,819,832,000 for 1965-66. Estimates for this year and the revised estimates for last year presented special problems in forecasting federal revenues for schools and their impact on school expenditures. With regard to last year's estimates, the federal revenues which were spent for summer programs after the close of the school fiscal year in June 1966 are accounted for in some states as revenues and expenditures for 1965-66 and in others as entries in 1966-67. With regard to this year's estimates, 1966-67, there was further uncertainty both as to the amount of the state allocations under the various federal programs and the legal limitations which exist in some states forbidding a local school system to budget for expenditures based on revenues which are not secured.

From 1956-57 through 1966-67, school revenue receipts increased 157.1 percent at an annual rate of 9.9 percent for the decade. Below are shown the revenue receipts since 1956-57 as reported by the U. S. Office of Education and the NEA Research Division estimates (NEA Research Division estimates are starred):

		Revenue receipts	
School year	Amount (in thousands)	Percent increase over 1956-57	Percent increase over previous year
1956-57 1957-58 1958-59 1959-60 1960-61 1961-62 1962-63 1963-64 1964-65 1965-66 1966-67	\$10,431,700* 12,181,513 12,423,756* 14,746,618 15,320,340* 17,527,707 18,769,388* 20,544,182 21,962,262* 24,819,832* 26,821,486*	16.8% 19.1 41.4 46.9 68.0 79.9 96.9 110.5 137.9	16.8% 2.0 18.7 3.9 14.4 7.1 9.5 6.9 13.0 8.1

State-by-state figures of the sources of school revenue are given in Tables 9 and 10, columns 2-4 and 6-8, for the years 1965-66 and 1966-67. These figures show an expected \$234,149,000 increase in federal revenues, an expected increase of \$954,693,000 in state revenues, and an expected increase of \$812,812,000 in local revenues, for a total increase of \$2.0 billion in revenue receipts for the year.

The following figures show the percents of revenue receipts from federal, state, and local sources for the years 1956-57 through 1966-67 as reported by the U. S. Office of Education and in the estimates of the NEA Research Division. The share from federal revenue receipts was fairly constant through 1964-65. In 1965-66, it doubled owing to new and expanded federal programs. The NEA Research Division estimates are starred in the series shown below:

	Percent (of school rev	venue derived from
	Federa1	State	Local and other
School year	sources	sources	sources
1956-57	3.7%*	39.8%*	56.5%*
1957-58	4.0	39.4	56.6
1958-59	3.6*	39.5*	56.9 *
1959-60	4.4	39.1	5 6. 5
1960-61	3.8*	39.8*	56.4 *
1961-62	4.3	38.7	56.9
	3.6*	39.3*	57 .1 *
1962-63	4.4	39.3	56.4
1963-64	3.8*	39.7*	56.5*
1964-65		39.2*	53.1*
1965-66 1966-67	7.7* 8.0*	39.9*	52.1*

Nonrevenue Receipts

Nonrevenue receipts include all monies received from loans, sales of bonds, sales of property purchased from capital funds, and insurance adjustments. The nonrevenue receipts for 1966-67 were \$3,373,422,000, up 6.9 percent from the revised estimate of \$3,154,371,000 for 1965-66. From 1957-58 to 1966-67, nonrevenue receipts increased 34.1 percent. Total nonrevenue receipts are shown in a combination of figures from the U.S. Office of Education and the NEA Research Division estimates, which are starred:

School year	Nonrevenue receipts (in thousands)
1957-58	\$2,514,676
1959-60	2,615,707
1960-61	2,791,361*
1961-62	2,512,959
1962-63	2,930,662*
1963-64	2,520,545
1964-65	2,724,186*
	3,154,371*
1965-66	3,373,422*
1966-67	3,3/3,422"

EXPENDITURES

The total expenditures of the public schools, including current expense, capital outlay, and interest, increased from \$25,391,254,000 in 1965-66 to an estimated \$27,762,098,000 in 1966-67. The increase of \$2.4 billion includes expected expenditures made possible by recent federal appropriations, by rising state appropriations, and by local tax revenues. Increased expenditures are estimated for all major categories of expenditure, i.e., current expenditures for elementary and secondary day schools, current expenditures for other programs (community services, community colleges, adult education, etc.), capital outlay, and interest on school debt.

Estimates for this year and the revised estimates for last year presented special problems in forecasting federal revenues for schools and their impact on school expenditures. With regard to last year's estimates, the federal revenues which were spent for summer programs after the close of the school fiscal year in June 1966 are accounted for in some states as revenues and expenditures for 1965-66 and in others as entries in 1966-67. With regard to this year's estimates, 1966-67, there was further uncertainty both as to the amount of the state allocations under the various federal programs and the legal limitations which exist in some states forbidding a local school system to budget for expenditures based on revenues which are not secured.

Total Expenditures

The total amount to be spent during 1966-67 for current expense, capital outlay, and interest on school debt is estimated at \$27,762,098;000. This represents a 9.3-percent increase over the total expenditures in 1965-66 and a 131.4-percent increase over 1956-57.

The total expenditures from 1956-57 to 1966-67, as reported by the U. S. Office of Education and by the NEA Research Division, are as follows (NEA Research Division estimates are starred):

4		Total e	xpenditures
•		Percent	Percent in-
	Amount	increase over	crease over previous
School year	(in thousands)	<u> 1956-57</u>	year
1956-57	\$11,994,992*

1963-64	21,324,993	77.8	8.1
1964-65	23,029,742*	92.0	8.0
1965-66	25,391,254*	111.7	10.3
1966-67	27,762,098*	131.4	9.3

Current Expenditures

Current expenditure of elementary and secondary day schools includes amounts paid for general control, instructional service, operation, maintenance, fixed charges, and other school services at all levels of administration--state, intermediate, and basic local. Current expenditure comprises all governmental contributions to the retirement fund and expenditure for school services, including attendance, health services, transportation, food services, and other. This figure does not include payments for capital outlay and interest on school debt or, except when otherwise noted, amounts spent for community colleges, adult education, summer school, and community services.

The estimated current expenditure increased from \$20,429,086,000 in 1965-66 to \$22,434,237,000 in 1966-67. The following figures show the increases in current expenditure as reported by the U. S. Office of Education and the NEA Research Division (NEA Research Division estimates are starred):

Current expenditures for public elementary

	and secondary day schools							
	Amount	Percent increase	Percent increase					
School year	(in thousands)	over 1956-57	over previous year					
1956-57	\$ 8,921,100*							
1957-58 ^a /	10,251,843	14.9%	14.9%					
1958-59 ,	10,851,079*	21.6	5.8					
1959-60 ^a /	12,329,389	38.2	13.6					
1960-61 ,	13,147,075*	47.4	6.6					
1961÷62 ^a /	14,694,418	64.7	11.8					
1962-63	15,606,328*	74 . 9	6.2					
1963-64	17,218,446	93.0	10.3					
1964-65	18,548,925*	107.9	7.7					
1965-66	20,429,086*	129.0	10.1					
1966-67	22,434,237*	151.5	9.8					

a/ Includes expenditures for community colleges, adult education, and summer school programs in California.

Annual increases over the past 10 years have averaged 9.7 percent. In the 10 years since 1956-57, current expenditures for public elementary and secondary day schools have increased 151.5 percent.

Current Expenditure per Pupil in ADA

The current expenditure per pupil in average daily attendance (ADA) for elementary and secondary day schools for 1966-67 is estimated at \$564, an increase of \$39 over the revised figure of \$525 for 1965-66.

The following figures show the average cost per pupil in ADA for each year since 1956-57 and the percent increases in cost per pupil in ADA (NEA Research Division estimates are starred):

		nt expenditure per p mentary and secondar	-
School year	Amount	Percent increase over 1956-57	Percent increase over previous year
1956-57	\$309*	• • •	• • •
1957 - 58	341	10.4%	10.4%
1958-59	351*	13.6	. 2.9
1959-60	375	21.4	6.8
1960-61	393*	27.2	4.8
1961-62	419	35.6	6.6
1962-63	433*	40.1	3.3
1963-64	460	48.9	6.2
1964-65	484*	56.6	5.2
1965-66	525*	69.9	8.5
1966-67	564*	82.5	7.4

Current expenditure per pupil in ADA increased from \$309 in 1956-57 to an estimated \$564 in 1966-67, a rise of 82.5 percent. Variations among the states in expenditures per pupil are great. Estimated expenditure per pupil in ADA for 1966-67 varies from a low of \$315 to a high of \$912. Expenditures per pupil in ADA in the 50 states are distributed as follows:

Current expenditure per pupil in ADA for elementary and secondary day schools	Number of states
\$300-349	. 1
350-399	
400-449	
450-499

550-599	
600-649	
650-699	_
700-749	
750 and over	_

Current Expenditure per Pupil in ADM

Average daily membership (ADM) is recommended as a better measure than ADA for use in computing per-pupil expenditure. It represents an average of the pupils belonging--those attending (ADA) plus those absent--and provides a measure of the actual number of pupils for whom the expenditures were made. Because some states have not adopted this method of pupil reporting, figures on expenditures per pupil in ADM are incomplete.

Column 4 of Tables 11 and 12 gives the expenditure per pupil in ADM for 1965-66 (revised) and for 1966-67 for each of the 44 states and the District of Columbia reporting average daily membership. From this incomplete return, the NEA Research Division has estimated that for the 50 states and the District of Columbia the expenditure per pupil in ADM as \$492 for 1965-66 and \$529 for 1966-67, or about 94 percent of the expenditure per pupil in ADA for each of these years.

The following figures show the average cost per pupil in ADM starting with 1957-58 (and later years where available). The percent increases in cost per pupil in ADM are also shown (NEA Research Division estimates are starred):

	Current expenditure per pupil in ADM for elementary and secondary day schools							
School year	Amount	Percent increase over 1957-58	Percent increase over previous year					
1957-58 1959-60 1960-61 1961-62 1962-63 1963-64 1964-65 1965-66 1966-67	\$315 354 369* 394 404* 434 454* 492* 529*	12.4% 17.1 25.1 28.3 37.8 44.1 56.2 67.9	12.4% ^a / 4.2 6.8 2.5 7.4 4.6 8.4 7.5					

a/ Percent of change for the biennium.

Current Expenditures for Other Programs

Current expenditures for programs other than elementary and secondary day school programs include expenditures for summer schools, community colleges, adult education, and for community services (public libraries, community centers, recreational programs, etc.) when operated by local school districts.

Current expenditures for other programs amounted to \$700,569,000 in 1965-66 and to \$862,218,000 in 1966-67, an increase of 23.1 percent. This substantial increase reflects the addition of community college programs in some states, increased funds for vocational and adult education, and the many new and expanded community services being administered by local school systems.

CONTROL OF THE PROPERTY OF THE

Capital Outlay

Capital outlay was estimated at \$3,416,065,000 for 1965-66 and at \$3,553,110,000 for 1966-67. The trend in expenditures for capital outlay is given below for the years 1957-58 through 1966-67 by combining figures from the U. S. Office of Education and estimates of the NEA Research Division (NEA Research Division estimates are starred):

	School year	Capital outlay expenditures (in thousands)	Percent of change over 1957-58	Percent of change over previous period
19	957 - 58	\$2,852,747	• • •	• • • •
	959-60	2,661,786	- 6.7%	-6.7% ^{a/} +7. <u>5</u> a/
19	961-62	2,862,153	+ 0.3	+7. <u>5a</u> /
19	962-63	3,130,697*	+ 9.7	+9.4
19	963-64	2,977,976	+ 4.4	-4.9
19	964-65	3,241,285*	+13.6	+8.8
19	965-66	3,416,065*	+19.7	+5.4
19	966-67	3,553,110*	+24.6	+4.0

a/ Percent change for the biennium.

Expenditures for capital outlay show increases from 1957-58 to 1966-67 at an annual rate of 2.5 percent.

Interest on School Debt

For the school year 1955-56 the total expenditure for interest was estimated at \$845,534,000. For the school year 1966-67 this expenditure increased to \$912,533,000, a gain of 7.9 percent. The trend from 1957-58 through 1966-67 is shown below by combining figures from the U.S. Office of Education and the NEA Research Division (NEA Research Division estimates are starred):

School year	Expenditures for interest (in thousands)	Percent in- crease over 1957-58	Percent in- crease over previous period
1957-58	\$341,922	•••	•••
1959-60	489,514	43.2%	43.2% a /
1961-62	587,823	71.9	20.1ª/
1962-63	626,674*	83.3	6.6
1963-64	701,044	105.0	11.9
1964-65	738,525*	116.0	5.3
1965-66	845,534*	147.3	14.5
1966-67	912,533*	166.9	7.9

a/ Percent change for the biennium.

Since 1957-58, interest payments on school debt have almost tripled. In 1957-58, interest on school debt constituted nearly 2.5 percent of total expenditures; an estimated 3.3 percent of the total expenditures will be paid in interest by 1966-67.

a/ Chief school administrators.
b/ Excludes 10 small districts with administrators who are fulltime teachers.

c/ Includes 12 county vocational school directors.

d/ Includes 479 supervising principals.

e/ Includes 265 supervising principals. <u>f</u>/ Excludes 7 Special Town School Districts.

g/ Excludes 28 intermediate county superintendents.

h/ Excludes an estimated 100 persons who serve as trustees of township school systems, members of joint school boards, and consolidated systems under the general supervision of county superintendents.

i/ Excludes 21 intermediate county superintendents.
i/ As of June 30, 1967, end of school year.
k/ Administrative heads of kindergarten or grades 1-12 districts.
l/ Law permits certain districts to send pupils to Laboratory
Schools operated by state colleges.
m/ Includes chief executive officers.
n/ Preliminary estimates by NEA Research Division confirmed by Montana State Education Association. tana State Education Association.

o/ Includes 3 districts headed by principals and 3 by head teachers.

*Estimated by NEA Research Division. N. A. Not available.

a/Represents the total number of original entries in public
schools within each state. Pupils enrolled in two or more states
during the school year are counted more than once; therefore, the
total for the United States is inflated by this duplication.

b/ The U. S. total average daily membership is estimated by NEA

b) The U. S. total average daily membership is estimated by NEA Research Division on basis of the ratio of average daily membership to cumulative enrollment for those states reporting ADM.

c/ Excludes pupils attending publicly supported private academies and out-of-state schools.

d/Excludes vocational schools not operated as part of the regular public school system.

c/ Estimated by NEA Research Division at 102% of cumulative enrollment.

f/Includes graduates from vocational high school, Capitol Page School, etc.

g/ End-of-school year estimates; elementary enrollment includes 12,000 Head Start pupils.

hy Estimated data by NEA Research Division confirmed by Montana Education Association.

i/Adjusted to exclude excused absences for purposes of this report.

*Estimated by NEA Research Division. N.A. = Not available.

a/ Percents may not add to 100.0% because of rounding.

b/ Includes all professional personnel except superintendents.

c/ Adjusted by NEA Research Division.

d/ Based on sampling study made by Iowa Education Association.

 $\underline{e}/$ Less than 1/10 of 1 percent. $\underline{f}/$ NEA Research Division estimates confirmed by Montana Educa-

tion Association.

g/ All dollar amounts for Alaska should be reduced by about onefigures reported for other areas of the United States.

UVANY DESERBATED					_									

^{*}Estimated by NEA Research Division. N.A. = Not available.

E/ Less than 1/10 of 1 percent.
E/ NEA Research Division estimates confirmed by Montana Educa-

tion Association.

^{*}Estimated by NEA Research Division. N.A. = Not available.

a/ Percents may not add to 100.0 percent because of rounding.

b/ Based on Consumer Price Index of 114.1, U. S. Bureau of Labor

Statistics, September 1966.

c/ Includes all professional personnel except superintendents.

d/ Adjusted by NEA Research Division.

c/ Based on sampling study made by Iowa Education Association.

h/ All dollar amounts for Alaska should be reduced by about one-fourth to make the purchasing power of Alaska figure comparable to figures reported for other areas of the United States.

*Estimated by NEA Research Division. N.A. = Not available. a/Parcents may not add to 100.07, because of founding. b/Includes all federal grant programs to state and local systems including aid to federally impacted areas, school lunch and milk, National Defense Education Act, Manpower Development and Training Act, vocational education, Economic Opportunity Act, Elementary and Secondary Education Act, etc. Estimates of federal revenues under Title I of ESEA have generally been included on the basis of expected expanditures for the 1966-67 school year. c/Includes revenues from local and intermediate sources, Bifts, and tuition and fees from patrons. d/Excludes state's share of teacher retirement and social security. g/Includes funds not handled by custodian of school funds. f/Federal revenues are probably underestimated because of state law which prohibits a county from budgeting receipts or expenditures for federal programs until the projects are actually approved and funds committed. g/Includes approximately \$40,000,000 from sale of state bonds for school construction. h/Includes \$169,100,000 in state revenue to local school systems, \$15,000,000 for teacher retirement, and \$4,400,000 for operation of state department of aducation. i/Includes local funds for debt retirement. J/ESEA revenues reported on a "cash receipts" basis. k/Excludes raceipts from students, etc., for athletics, book rentals, and other student and community services. 1/Includes \$5,500,000 from federal funds paid to districts too late to be included in 1965-66 receipts. m/ Includes proceeds from county bond issues. m/ Includes revenues for operation of the Public School Finance Division which is not a part of the state department of education. J/Excludes revenues for includes revenues for public junior colleges which are no longer under local school systems. p/NEA Research Division estimates confirmed by the Montane Education Association. d/Adjusted to include estimated deficit in School Lunch Program.
